TRETTIOFEMTE BANDETS INNEHÅLL

Sid.

1. Nieminen, I., Radiative capture of positrons by electrons and the use of the Born approximation 1– 30
2. Rundgren, J., Electron diffraction in gases. Scattering in diffuse beams 31– 49
3. Höjeberg, M. and Malmskog, S. G., Decay of the 16.3 min ^{182}Ta isomer 51– 56
4. Halpern, L., On the role of bose statistics at gravitational transitions . 57– 69
5. Holmqvist, B. and Wiedling, T., Inelastic neutron scattering cross sections of Cu^{63} and Cu^{65} in the energy region 0.7 to 1.4 MeV 71– 83
6. Andersson, L.-O. and Ödberg, L., NMR measurements of field gradients at Br nuclei surrounding a substitutional Cl ion in a KBr crystal . . . 85– 99
7. Wennerberg, J., Dimension and orientation of physical quantities . . . 101–117
8. Norlén, G., Interferometric measurements of Ar I and Ar II wavelengths in the region 5000–7000 Å 119–128
9. Persson, A., Blomqvist, C.-E. and Nordén, H., A new technique for measurement of thickness and optical properties of thin films grown on rough surfaces 129–132
10. Otterlund, I. and Andersson, B., Multiply-charged fragments in relativistic nucleus-nucleus collisions 133–147
11. Raunio, G. and Svensson, O., X-ray total reflection studies of germanium, gold, and glass by means of a three-crystal spectrometer 149–159
12. Svanson, S. E., Modulation-effect corrections of magnetic resonance line shapes 161–164
13. Nilsson, P.-O., Persson, A. and Nordén, H., The absorption band edge in gold 165–176
14. Löfgren, P., Wave packets in relativistic S-matrix theory 177–195
15. Malmskog, S. G. and Höjeberg, M., Absolute $M1$ and $E2$ transition probabilities in ^{233}U 197–218
16. Langlet, I. and Erlandsson, G., Resistivity anisotropy in evaporated thin films of Ni(NiO) 219–224
17. Eriksson, K. B. S., A computation of electrostatic interaction integrals connected with pair coupling in some light atoms 225–228
18. Malmskog, S. G. and Höjeberg, M., On the magnetic properties of the $K=1$ rotational band in ^{188}Re 229–236
19. Malmskog, S. G., Absolute $E1$, $\Delta K=0$ transition rates in odd-mass Pm and Eu-isotopes 237–253
20. Malmskog, S. G., The present status of the half life measuring equipment and technique at Studsvik 255–267
21. Rundgren, J., Macroscopic distribution of the binuclear distance in diatomic gas 269–282
22. Hedvall, P., Experimental observation of non-linear coupling between slow and fast waves in a plasma waveguide 283–286
23. Vlastós, A. E., The use of exploding wires in detecting spark-gap-switch de-ionization 287–293

24. Vlastós, A. E., On electrically exploded wire discharges 295–320
25. Samuelsson, B., Quenching experiments on n-type germanium 321–327
26. Sandblom, J., Transport processes and ion pair formation in liquid membranes 329–338
27. Szabo, I., Consecutive ion-molecule reactions in methane investigated by means of positive ion-impact 339–348
28. Bergström-Rohlin, S., Investigation of the $^{29}Si(p,\gamma)^{30}P$ reaction at proton energies 1460–1860 keV 349–356
29. Alexander, P. and Ryde, H., Search for a high spin three-quasiparticle state in ^{179}Ta 357–359
30. Rundgren, J., Electron interference in diatomic gas 361–370
31. Broman, L., Level structure of ^{43}Sc 371–391
32. Kjöllerström, B., Virtual electronic states in dilute alloys 393–401
33. Johansson, S. A. E. and Nilsson, L., The $^{12}C(\gamma, n)^{11}C$ cross section investigated by means of monoenergetic gamma radiation of variable energy 403–410
34. Nilsson, L. and Bergqvist, I., Yields and angular distributions of gamma rays from the $^{7}Li(p, \gamma)^{8}Be$ reaction 411–421
35. Jonsson, L., Hardell, R. and Arnell, S. E., Gamma rays from thermal neutron capture in natural neon 423–434
36. Mårtensson, S. and Stigmark, L., Precision frequency measurements of the 0-0 transition in optically pumped sodium 435–449
37. Bäverstam, U., Johansson, A. and Gerholm, T. R., Experimental studies of time dependent hf interactions caused by after-effects of hole formation 451–467
38. Atkinson, C., A simple model of relaxed expanding crack 469–476
39. Forssner, T., On the relativistic K-shell photoeffect 477–494
40. Isberg, B., Additions to the normal term system of the spectrum of atomic oxygen, O I 495–498
41. Edin, K.-A. and Peressutti, G., On the perturbation expansion in quantum electrodynamics 499–512
42. Torvén, S., Current limitation and electrical gas clean up in a low pressure mercury discharge 513–526
43. Skeppstedt, Ö., Hardell, R. and Arnell, S. E., Gamma rays from thermal neutron capture in natural argon 527–537
44. Karlsson, E. T., Stationary equilibrium of a toroidal plasma 539–550
45. Isberg, B., The spectrum of doubly ionized aluminium Al III 551–562
46. Andreen, C.-J., A simple transparency model for the channeling of low energy light ions in crystals 563–581
47. Andreen, C.-J., Experiments on the transmission of low energy light ions through thin films of different structures 583–593
48. Andreen, C.-J., Blocking of D^+ ions in single crystal gold films 595–604
